Also

- Continuous check of the readiness of goods
- Quality control of goods
- SBC (single buyer consolidation)
- Bonded warehouse at the port
- Arrangement of contacts to selected production plants
- Assisting in negotiations with potential suppliers, consulting activities in Bangladesh

HOW DOES IT WORK?

17.3.

The sender forwards the shipment to CFS warehouse

23.3.

CFS closing

23.3.

CFS closing

8.5.

Arrival of the shipment (ETA)

18.5.

Delivery of the shipment

Our partner actively communicates not only with us, but also with shippers and shippers. It is able to ensure the control of the goods and, if necessary, suspend the shipment or change the shipping parameter (change the method of transport if part of the goods does not correspond to the agreed parameters, e.g. LCL instead of FCL - after approval by the consignee). We carry out consolidations if the importer has multiple suppliers (single buyer consolidation). We have space in the state bonded warehouse and are able to arrange contacts to selected manufacturing plants according to the importer's needs. We can also assist with networking, negotiations and can also provide any consultation on local conditions or legislation in Bangladesh.
